

Campaign Brief - Q3 Trailhead Flash Sale

Broadcast campaign for Juniper & Coast late-summer inventory acceleration.

BRAND	Juniper & Coast	CAMPAIGN ID	JC-BRD-2025-0822
CHANNEL	SMS + MMS broadcast	CAMPAIGN DATES	August 22-23, 2025
OWNER	Mara Chen, Lifecycle Lead	STATUS	Completed and reconciled

Corpus notice: This is a synthetic demonstration document created for Cortex Search evaluation. Brand names, people, metrics, URLs, short codes, and incidents are fictional.

1. Objective and commercial context

Juniper & Coast planned a 36-hour flash sale to reduce late-summer outerwear units before the September fall launch. The primary objective was \$318,000 in attributed SMS/MMS revenue while protecting contribution margin above 48%. A secondary objective was to reactivate customers who had browsed outerwear in the prior 45 days but had not purchased in 120 days.

The offer was 25% off orders of \$125 or more with code TRAIL25. Gift cards, the Alpine Shell, and already-discounted Last Light items were excluded. The landing page was junipercoast.example/trailhead and the dedicated branded short domain was rly.jnpr.example.

2. Audience and segmentation

Audience component	Definition	Eligible	Sent
Core engaged	Clicked SMS or email in 90 days; no purchase in 14 days	96,412	91,008
Outerwear browsers	Viewed jacket, fleece, or rainwear product 2+ times in 45 days	34,906	31,777
Lapsed high value	Lifetime spend >= \$300; last order 121-365 days ago	17,302	15,199
Total deduplicated	Suppressed recent purchasers, STOP records, quiet-hour conflicts, and risk holds	148,620	137,984

The Pacific Northwest regional branch contained 23,804 intended recipients in Washington, Oregon, and Idaho. It used an MMS hero creative featuring the Ridgeway Anorak. This branch is the subject of Incident RF-INC-2025-0822-PNW and is summarized in the Q3 2025 Quarterly Performance Review.

3. Message variants and send plan

Variant	Audience split	Approved copy	Planned send
A - SMS	60% of national audience	Juniper & Coast: 36 hours only - take 25% off \$125+ with TRAIL25. Shop the Trailhead Flash Sale: {{short_url}}. Ends Sat 11:59 PM. STOP to opt out.	Fri Aug 22, 5:30 PM recipient local
B - MMS	40% of national audience	Trailhead Flash Sale: 25% off \$125+ through Saturday. Your next layer is waiting. Use TRAIL25: {{short_url}}. STOP to opt out.	Fri Aug 22, 5:30 PM recipient local
Reminder	Non-purchasing clickers and non-clickers	Last call from Juniper & Coast: TRAIL25 ends tonight. Save 25% on \$125+: {{short_url}}. Exclusions apply. STOP to opt out.	Sat Aug 23, 11:00 AM recipient local

The approved operating window was 5:30-5:45 PM local for the launch and 11:00-11:15 AM local for the reminder. RelayFox policy blocked any new batch after 8:00 PM recipient local. The Pacific Northwest batch began on time but completed at 7:44 PM because it inherited a 3 TPS fallback route rather than the approved 75 TPS production route.

4. Projected versus actual performance

KPI	Projection	Actual	Variance	Interpretation
Delivered messages	136,900	135,721	-1,179	98.4% delivery rate; within plan
Unique click-through rate	8.6%	7.9%	-0.7 pts	PNW branch reduced blended rate
Attributed orders	2,650	2,401	-249	Last-click orders within the 5-day broadcast window
Attributed revenue	\$318,000	\$286,740	-\$31,260	90.2% of target; 15.6% of Q3 messaging revenue
Average order value	\$120.00	\$119.43	-\$0.57	Offer threshold preserved basket size
Unsubscribe rate	0.28%	0.31%	+0.03 pts	Below 0.50% internal alert threshold

Regional result

The Pacific Northwest branch generated \$28,460 against a \$51,900 target, with 5.1% unique CTR and 1.02% order conversion. All other regions combined produced 8.4% unique CTR and 1.88% order conversion. The late queue completion explains an estimated \$18,000-\$24,000 of the revenue gap; the remainder is attributed to higher discount fatigue in Washington and Oregon.

Creative test

Variant B MMS increased unique CTR by 18% relative to Variant A SMS among recipients who received the message before 6:00 PM local. However, its revenue per delivered message was only 6% higher because MMS recipients skewed toward lower-AOV fleece shoppers. The team approved MMS for future high-intent outerwear segments but not for broad list sends.

5. Learnings and follow-up actions

- Throughput must be validated at launch. Add a preflight check that compares recipient count, route TPS, and estimated completion time. Owner: Messaging Operations. Due September 5, 2025.
- Use regional holdouts. Reserve 5% per region for future flash-sale incrementality studies. Owner: Analytics. Due October 1, 2025.
- Keep the threshold offer. Orders using TRAIL25 reached \$119.43 AOV, only \$0.57 below plan, and gross margin closed at 49.1%.
- Separate clickers from non-clickers in reminders. Clickers converted at 4.9%; non-clickers converted at 0.7%. Future reminders will use urgency for clickers and category discovery for non-clickers.
