

Campaign Brief - Automated Welcome Flow

Four-step subscriber onboarding sequence for Juniper & Coast.

BRAND	Juniper & Coast	FLOW ID	JC-FLW-WELCOME-2026-01
TRIGGER	First valid SMS marketing consent	REPORTING PERIOD	January 1-June 30, 2026
OWNER	Darius Holt, CRM Manager	OPT-IN KEYWORD	COAST to 73311 (synthetic)

Corpus notice: This is a synthetic demonstration document created for Cortex Search evaluation. Brand names, people, metrics, URLs, short codes, and incidents are fictional.

1. Trigger, eligibility, and exits

A subscriber enters the Welcome Flow after RelayFox receives a valid first-party SMS marketing consent event from the Juniper & Coast embedded form, checkout checkbox, QR landing page, or keyword COAST. The system requires a consent timestamp, source URL or keyword, disclosure version, phone number, and device or session identifier before entry.

- Entry is limited to one time per normalized phone number in a rolling 365-day period.
- Customers with an order in the prior 24 hours skip Step 1 and enter Step 2 after 20 hours.
- The flow exits immediately on purchase, STOP-family opt-out, hard delivery failure, fraud hold, or support suppression.
- Messages are held until the next 8:00 AM-8:00 PM recipient-local operating window under RelayFox policy.

2. Sequence design

Step	Delay	Purpose	Approved message	Exit or branch
1. Welcome + offer	Immediate	Confirm subscription and deliver incentive	Welcome to Juniper & Coast, {{first_name default:"friend"}}. Take 10% off your first order with WELCOME10: {{short_url}}. Reply STOP to opt out.	Purchasers exit; link click sets high-intent flag
2. Brand proof	20 hours	Explain materials and reduce first-purchase risk	Built for weather, not waste. Meet our recycled layers, field-tested fits, and free size exchanges: {{short_url}}. STOP to opt out.	Outerwear browsers branch to jackets; others to bestsellers
3. Guided discovery	3 days	Drive a second session	Not sure where to start? Take the 60-second Trail Finder and get a personalized kit: {{quiz_url}}. Your WELCOME10 code is still active. STOP to opt out.	Quiz completers enter recommendation flow
4. Offer reminder	7 days	Create a clear final nudge	Last reminder: WELCOME10 expires for this welcome series tonight. Save 10% on your first Juniper & Coast order: {{short_url}}. STOP to opt out.	No purchase: exit to standard newsletter

3. Performance, January-June 2026

Metric	Result	Benchmark / target	Notes
New flow entrants	82,416	75,000	38% embedded form, 31% checkout, 19% QR, 12% keyword
Step 1 delivery rate	99.4%	>= 98.0%	486 hard failures; 71 carrier-filtered
Step 1 unique CTR	42.6%	35.0%	Offer link and preference-center clicks excluded from denominator
Flow conversion rate	7.8%	7.0%	6,429 attributed first orders
Attributed revenue	\$412,860	\$375,000	\$5.01 revenue per entrant; \$64.22 attributed AOV
Cumulative unsubscribe	3.2%	<= 4.0%	62% of unsubscribes occurred after Step 4

4. Tests and learnings

Timing test

A February 2026 test compared a 20-hour delay with a 24-hour delay before Step 2. The 20-hour cell produced a 2.3% lift in Step 2 CTR and no statistically meaningful increase in unsubscribe rate. It remains the default because it reaches most evening signups during the next afternoon rather than another late-evening slot.

Offer framing test

From April 6-20, 2026, 18,004 entrants were split between "10% off your first order" and "save 10% today." The first-order wording generated 8.1% conversion versus 7.5% for the urgency wording. The approved Copy Library now uses the first-order framing.

Keyword quality

Keyword COAST produced the smallest source cohort but the highest 30-day revenue per entrant at \$7.44. QR entrants from retail pop-ups converted at 5.9%, partly because 41% were already email subscribers and had prior brand familiarity without immediate purchase intent.

5. Measurement rules

Welcome-flow revenue uses the RelayFox flow default: an eligible click may occur within 7 days of message delivery, and the order must occur within 7 days of the most recent eligible click. View-through orders are not credited. When a subscriber clicks both the Welcome Flow and a broadcast, the most recent eligible SMS/MMS click receives credit.
