

Segmentation & Audience Playbook

Reusable RFM, engagement, behavioral, and geo definitions for e-commerce messaging.

VERSION	1.8	SNAPSHOT DATE	June 30, 2026
BRAND EXAMPLE	Juniper & Coast	MAILABLE LIST	512,880 subscribers
OWNER	Priya Raman, Growth Analytics	REFRESH	Daily at 4:00 AM PT

Corpus notice: This is a synthetic demonstration document created for Cortex Search evaluation. Brand names, people, metrics, URLs, short codes, and incidents are fictional.

1. RFM model

RelayFox assigns each customer a 1-5 score for recency, frequency, and monetary value using trailing 24-month Shopify order data. Scores are calculated within the brand, not against an industry benchmark.

Score	Recency: days since order	Frequency: orders / 24 mo	Monetary: net spend / 24 mo
5	0-30	5+	\$500+
4	31-60	4	\$300-\$499.99
3	61-120	3	\$175-\$299.99
2	121-240	2	\$75-\$174.99
1	241+ or never	0-1	<\$75

Refunds reduce monetary value; cancelled and fully refunded orders do not count toward frequency. A customer with R5/F4/M5 is highly valuable and recent even if not yet at the maximum frequency score.

2. Messaging engagement tiers

Tier	Definition	June 30 size	Recommended cadence
E1 - Hot	Clicked SMS/MMS in 30 days or purchased from messaging in 60 days	118,420	Up to 3 promotional messages / week
E2 - Warm	Delivered in 90 days and clicked in 31-90 days	164,870	1-2 / week
E3 - Passive	Delivered in 90 days, no click in 90 days, no complaint signal	142,605	2-4 / month
E4 - Cooling	No click in 91-180 days or 3 consecutive ignored campaigns	57,915	1 / month plus repermission test
E5 - Dormant	No click in 181+ days	29,070	Suppress from routine broadcasts

3. Example production segments

Segment name	Definition	Size	Primary use
Summit Circle VIP	R >= 4 AND F >= 4 AND M >= 4; opted in; no open support case	24,806	Early access, loyalty benefits, limited drops
Outerwear Intent 45D	Viewed jacket/fleece/rainwear 2+ times in 45 days; no order in 14 days	38,219	Category launches and flash sales
Cart Rescue Eligible	Checkout started in 4 hours; consent valid; cart value >= \$55; no purchase	3,880 daily avg	Automated cart flow
Lapsed High Value	M >= 4; last order 121-365 days; no SMS click in 60 days	19,744	Winback offer with holdout
PNW Active	WA, OR, or ID shipping state; E1-E3; timezone known; not frequency-capped	82,116	Regional weather, store events, localized creative
New Subscriber No Order	Consent in 14 days; zero lifetime orders; not currently in Welcome Flow	11,308	Diagnostic and onboarding recovery

4. Geography and timezone

Geo fields are ranked by reliability: verified shipping state, billing state, device timezone at consent, ZIP code, and area-code inference. A campaign may use area code for broad planning but not for quiet-hour enforcement when a more reliable field exists.

Region	States	June 30 mailable	Q2 revenue / send
Pacific Northwest	WA, OR, ID	82,116	\$0.284
West	CA, NV, AZ, HI, AK	128,604	\$0.301
Mountain	MT, WY, UT, CO, NM	49,517	\$0.276
Central	ND, SD, NE, KS, OK, TX, MN, IA, MO, AR, LA, WI, IL	116,220	\$0.298
Northeast	ME through PA and DC	88,310	\$0.337
Southeast	DE through FL plus KY and TN	48,113	\$0.289

5. Suppression and overlap rules

- Global suppressions always win: STOP, litigation hold, fraud, hard invalid, employee/test, or support-requested pause.
- Recent purchaser suppression is offer-specific. The Trailhead Flash Sale excluded orders in the prior 14 days; a product education campaign may include them.
- When a customer belongs to multiple campaign cells, assign by priority: triggered flow, VIP, category intent, engagement tier, broad audience.
- Do not sum segment sizes to estimate audience. The June 30 segments above overlap; the deduplicated mailable list is 512,880.
- Every major broadcast reserves a 5% regional holdout unless the objective is operational or legally required.

6. Quality checklist

- 1 Preview 25 random records and 25 boundary records.
- 2 Compare size with the prior 4-week range and explain changes above 10%.
- 3 Confirm timezone coverage and projected quiet-hour completion.
- 4 Validate that merge-tag fields are populated or have defaults.
- 5 Document exclusions, priority, holdout, and snapshot timestamp in the campaign brief.
